

Climate Change Awareness Day

Year 4 have been learning about Deforestation

People are chopping down trees in the rainforests at an alarming rate. The trees produce oxygen which is good for us. They also take away carbon dioxide which is bad for the earth. Without trees, more carbon dioxide will be in the air and cause the Earth to get hotter.

Also, without trees, many animals are losing their habitats and are at risk of extinction.

Climate Change

The Earth getting hotter, changes the climates across the world. This can lead to melting ice caps, floods, drought and storms. Animals and people are at risk.

On **Monday 27th June 2022**, please can you wear green clothing or animal print clothing to help raise awareness of the problems of deforestation.

You may also bring a small teddy of an endangered animal.

Please bring a **£1 donation** to support our cause. The money raised will be going towards Chester Zoo, for their conservation work to support endangered animals and to our school's eco club.

We will have a Cake Sale at playtime on Monday 27th June! Please bring in donations of cakes and 50p to buy a cake!

Thank you for your support! From the children in Year 4!
